Hot Sauce Your Tops

Software Updates and Add-Ons
(6-10-20)

Dear Hot Sauce Admins & Users,

We have another new software update! We now have greater storage to increase capacity for upcoming changes, as well as location drop down menus and user data reported by names. Read below to learn more!

STORAGE
We have increased storage capacity in the App so that we can continue to add new Hot Sauce offerings, as well as increase the amount of photos and data! Stay tuned for some more photos and keep sending in your new offering ideas!

JOB LOCATION
We have also added a "Job Location" dropdown on the login page to identify the specific Hot Sauce upgrade for each job (bar, kitchen, etc.).

 – There is a set list of locations (the most common) that will always populate (in alphabetical order).

– Users can then scroll or start typing in the location name to pull from the list, so they can differentiate between which location they would like to attribute their upgrade to!

– If you are in need of a new location, you can choose "Other" and enter in your unique location. And any Admin can add a location that is frequently used or delete a location not used.
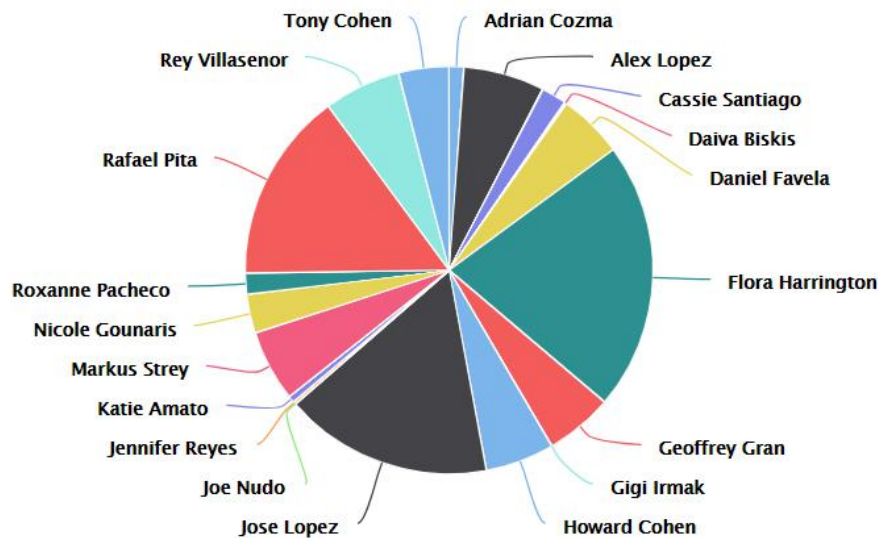

USER DATA BY NAME

One of our users suggested we update the User Metrics by name instead of e-mail for easier reporting! Great suggestion and keep them coming!

Life-Time-To-Date-Sales Per User

COMING SOON AND OTHER NEWS!

-New Hot Sauce Offerings

-Ability for Admins to edit/delete Hot Sauce sales.

-Please be on the lookout for a survey- we'd love your feedback on ways to improve the App.

-Follow our Facebook Page for new tips, tricks, best practices, and other Hot Sauce Updates,
